

Haarlem, september 2020

Aan de leden van de NVGE, NVMDL, NVH en V&VN MDL

Geachte leden,

In vervolg op onze eerdere berichtgeving informeren wij u hierbij over de online activiteiten in de komende periode.

Het online programma zal bestaan uit de volgende onderdelen:

- Livestream op **woensdag 9 september van 17.00 tot 18.30 uur**
- 10 webinars zijn beschikbaar op **dinsdag 29 september, donderdag 12 november en op woensdag 9 december** van 12.00 tot 00.00 beschikbaar zijn.

Registreren voor DDD Online betekent dat u zowel de livestream op 9 september, als *alle* webinars op bovengenoemde data kunt volgen en hieruit een vrije keuze kunt maken. Hiervoor geldt één inschrijvingsbedrag. Leden ontvangen een korting op de inschrijving. De online activiteiten zijn voor accreditatie aangeboden.

De webinars bieden een veelzijdig programma, niet alleen vanuit de secties van de NVGE verzorgd, maar ook een NASH-symposium i.s.m. de Nederlandse Vereniging voor Hepatologie en een E-learning rond acuut leverfalen onder auspiciën van de Nederlandse Vereniging van Maag-Darm-Leverartsen. Voor de verpleegkundigen zal een samengestelde webinar beschikbaar komen met interessante lezingen vanuit de andere webinars.

Het volledige programma vindt u op de hierna volgende pagina's. Inschrijven kunt u via de toegezonden link of via [www.mdl-congressen.nl](http://www.mdl-congressen.nl). Wij hopen op enthousiaste deelname en wellicht ook gezamenlijk kijken van de webinars door afdelingen. Informatie over de inlogprocedure ontvangt u op de dag van de activiteit.

Met vriendelijke groet,

Prof. dr. C.J. (Janneke) van der Woude, secretaris

**NVMDL webinar nieuwe richtlijn Acuut Leverfalen**

*Met casuïstiek, verzorgd door prof. dr. H.J. Metselaar, Hoogleraar Leverfalen & Levertransplantatie*

Acuut leverfalen is een zeldzame aandoening met een voorkomen in Nederland van 20 tot 80 gevallen per jaar. Het klinische beeld wordt veroorzaakt door een plotse en ernstige beschadiging van de lever, bij een tevoren normale lever. De belangrijkste oorzaken in Nederland zijn overdosering met paracetamol, idiosyncratische reactie op medicijnen en virale hepatitis. De belangrijkste gevolgen zijn icterus, hepatische encefalopathie, stollingsstoornissen, nierinsufficiëntie en multi-orgaan falen. Acuut leverfalen heeft een zeer hoge mortaliteit, waarbij snelle diagnose en behandeling (inclusief levertransplantatie) essentieel zijn. De NVMDL heeft in 2018 een multidisciplinaire werkgroep ingesteld om samen met het Kennisinstituut van de Federatie Medisch Specialisten de oude richtlijn acuut leverfalen te herzien volgens de eisen van de Medische Richtlijnen 2.0 van de adviescommissie Richtlijnen van de Raad Kwaliteit. De nieuwe richtlijn is opgebouwd uit 11 modules, waaronder herkenning en diagnostiek, ondersteuning en monitoring, behandeling van specifieke oorzaken en bepalen van kans op overlijden en noodzaak tot levertransplantatie.

Aan de hand van casuïstiek zullen de 11 modules en de belangrijkste nieuwe inzichten worden besproken. Tijdens de webinar zal uw opgedane kennis over acuut leverfalen worden getoetst. Het programma maakt deel uit van de serie webinars die via de DDD wordt aangeboden. U ontvangt hierover binnenkort via de NVGE bericht.

*De richtlijn bespreking wordt afgesloten met 10 toetsvragen*
