

UEG & you

Your top tier guidelines resources

We are committed to providing you with resources and tools that help you develop and implement appropriate standards of GI care. Whether you are coordinating standards and guidelines initiatives, or are looking for fresh input to your daily practice, we invite you to benefit from the following free resources:

UEG framework for the development of high-quality clinical guidelines

The [framework for the development of high-quality clinical guidelines](#) provides an overview of how to best develop a high-quality guideline and a tool for readers to critically appraise the guidelines' quality. We believe that using this framework will increase the potential to produce an excellent guideline which is transparent,

Guideline implementation toolbox

The [toolbox](#) aims to be an inspiration for guidelines dissemination projects. It contains a checklist of questions that should be taken into consideration when applying international, specialist society guidelines to national or local practice. It also includes a list of practical examples and tools, to show how guidelines can be adapted, displayed,

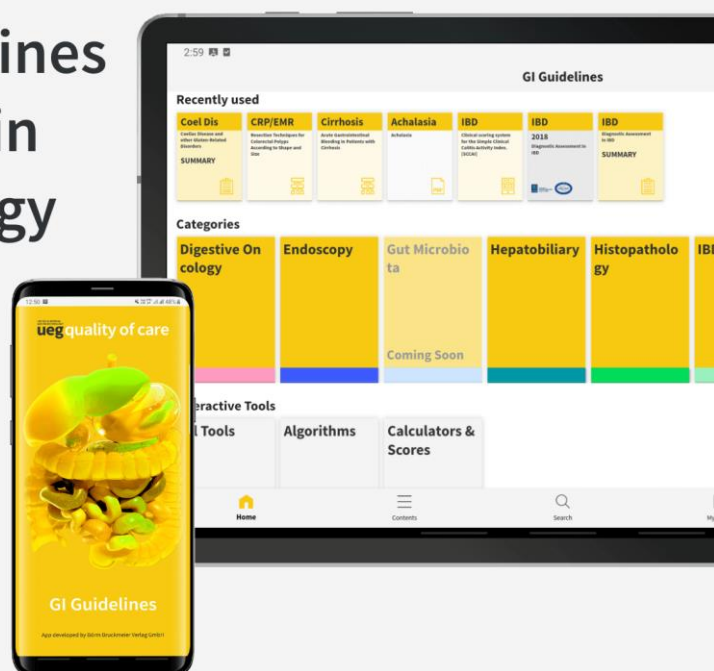

independent, reproducible, and implementable.

[Access article](#)

and distributed for easier use in daily clinical practice.
