## Horizon 2020 Application Support - a success story

The Horizon 2020 Application of the project DISCOVERIE (Development, diagnosis and prevention of gender-related Somatic and mental COMorbidities in irritable bowel syndrome In Europe) was a huge success and received a grant of 6 million Euros. This is a huge success for IBS research in Europe, since this area has been heavily underfunded at the European level and also for UEG and our Research Committee who have supported their application through UEG € 10.000 Application Support grant.

You need support for your submission to an Horizon 2020 funding call too? UEG would be happy to support you. Apply now!
